AI for Sustainable Development Goals Collaboration Initiative

Woxsen University

India

The AI for Sustainable Development Goals Collaboration Initiative (AI4SDG) leverages AI to achieve sustainable development. It encompasses impactful initiatives in food wastage management, healthcare innovation, education, skills development, and support for entrepreneurs and SMEs. Through partnerships, the program drives innovation, addresses challenges, and contributes to sustainable development. Future prospects include growth, expanded partnerships, and advancements in leveraging AI for sustainable development goals.

Our Program's Impact and Success: Implemented reuse initiatives, reduced food waste with a management system app, developed healthcare apps, partnered with 100 international educational institutions, certified 1000 individuals in high-demand skills, supported 6 entrepreneurial innovations creating 500 jobs, driving sustainable development.
